DETAILED ACTION

1. This office acknowledges receipt of the following items from the applicant:
Information Disclosure Statement (IDS) was considered.
2. Claims 43 – 54 are presented for examination.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claims 43 – 48 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 43, the term “isolation” in line 3 introduces no clear meaning as to either the function or structure of the timing circuit in which “isolation signal” would be necessary.

A brief explanation of the purpose of this “isolation signal” in the claim is suggested to overcome this type of rejection, i.e. ‘sense amp isolation signal’, etc....

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
6. Claims 49 – 54 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one

Art Unit: 2818

skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

In claim 49, line phrases “ ... isolation signal connected to a second memory array ... ” is neither described in the specification nor it is shown in fig. 2, in which the isolation signal is connected to a sense amp bank.

Appropriate correction is required to overcome this type of rejection.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Hoang (US Pat 5,970,022).

Regarding claim 43, Hoang disclosed a timing circuit (fig. 4, timing circuit 132), comprising:

an input adapted to receive at least one input signal (fig. 4, input from detector 134), the at least one input signal including an isolation signal; and

an output connected to an address decoder (fig. 4, output connected to address decoder 110), wherein the timing circuit activates the address decoder based on the at least one input signal (col 7, lines 20 – 34).

Art Unit: 2818

Regarding claims 44 – 49, the additional limitations in these claims are considered well-known in the art.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Pat 5,999,480, US Pat 6,091,659, US Pat 6,107,134, US Pat 6,295,593 B1, US Pat 5,313,431, US Pat 5,838,990, US Pat 6,366,515 B2.

10. When responding to the office action, Applicant(s) are advised to provide the examiner with the page and line numbers in the application and/or references cited to assist the examiner to locate the appropriate paragraphs.

11. A shortened statutory period for response to this action is set to expire 3 (three) months and 0 (zero) day from the date of this letter. Failure to respond within the period for response will cause the application to become abandoned (see MPEP 710.02(b)).
